Temporary Walkway
Newport Transportation and Visitors Center

Expected Completion Date: June 2017

Project Highlights

- Overhead passenger protection, damaged in 2012 during Hurricane Sandy, has been redesigned to withstand high winds.

- Impact on Newport’s sewer system will be minimized and flooding during future storms mitigated.

- Upgraded lighting, signage and other features make it easier for passengers to make their transit connections.

- Careful attention has been paid to design and aesthetics, in keeping with the facility’s importance to Rhode Island’s tourism industry.
