

How Will We Select A Site?

We're looking for the best place to build RIPTA's new transit center, and we're taking a lot of things into account including the factors below.

Place a dot next to the **three** criteria you think are most important.

Evaluation Criteria	
How does the site improve transit service?	
Access: How many residents and workers are within 1/4-mile walking distance?	Place dots here
Ridership: Will this location accommodate existing and future ridership needs?	Place dots here
Location: How will this impact riders' walking distance to key locations	Place dots here
Transfers: Will this location make it easier to transfer between buses?	Place dots here
Mobility: How many people & jobs are within 1/4-mile walking distance of bus stops that connect to the transit center?	Place dots here
How does the site improve bus operations?	
Directness: How easy is it to understand service? And how directly does the bus travel to and from major destinations?	Place dots here
Downtown Speed & Reliability: Will this location make it easier for buses to get into and through downtown?	Place dots here
Safety & Resiliency: How safe are bus movements? And how resilient is a facility in the event of emergency or natural disaster?	Place dots here
How does the site impact finances?	
Operating Cost: How will the site change bus and facility operating costs?	Place dots here
Capital Cost: What is the cost to build facility and purchase new buses (if needed)?	Place dots here
Partnership: Are partners able to fund the project cooperatively at this site?	Place dots here
Is the site a good fit for transit-oriented development?	
TOD: is there an opportunity for transit-oriented development?	Place dots here
Is the site feasible to acquire and develop?	
Feasibility: How easy would it be for RIPTA to acquire and develop the site?	Place dots here
